GATEWAY LOGAN UPGRADE | KAPSCH PROJECT MANAGEMENT SUPPORT

The Client

[Kapsch TrafficCom is a provider of intelligent transportation systems in the fields of tolling, traffic management, smart urban mobility, traffic safety and security and connected vehicles.

The Project

Kapsch were engaged to replace the aging tolling equipment on the Gateway and Logan Motorways (Qld) with current hardware and systems. This replacement covered 13 tolling locations on the network.

Kapsch engaged Flagstaff to develop the contract program and progress reporting. This was later extended to providing interim project management support for the Kapsch delivery team.

Fig: Gateway Logan motorway Network

Gateway Bridge North - Gantry

The Challenge

- Brownfield environment across operating motorways and tolling locations.
- Gantry structure installations over live motorways
- Systems integration with existing back-office

The Outcome

- The project was successfully delivered without loss of tolling revenue on the network.
